

We DEVELOP

ASSET MANAGER

Simplified, faster and high-end management of your maintenance activities through a dedicated 3D model

A single cloud access to several key information sources for all the actors involved in structure maintenance by recording, assessing, monitoring and reporting structural damages precisely on asset digital twin

Benefits

Efficiency

- Access all the necessary documents from one centralised software
- Instant damages and previous repairs visualisation on a 3D representation of your asset
- Improve field operation thanks to dedicated decision-making workflow

Reliability

- Gaining control of the complete maintenance workflow from creation to repair
- No more error, each damage is uniquely labeled for consistent tracking
- Ensure activity monitoring to prevent accidental information loss

Flexibility

- Manage all your assets from the same interface
- Customizable and adaptable to any structures under rigorous maintenance plan

Traceability

- Thanks to this connected cloud-based solution, always access the most updated documentation, asset maintenance status, etc.

Ergonomic

- Universal damage status codification for your organisation for rapid and easy interpretation
- User experience orientated: one-single step to report your damage and guided operation through pre-defined menus

We DEVELOP

ASSET MANAGER

Simplified, faster and high-end management of your maintenance activities through a dedicated 3D model

Features

- One single access to many manuals
- Precise location and reading on 3D mock-up
- Rapid data log and decision making
- Multi-fleet
- Multi-operating system
- From event creation to assessment and repair
- Unique event identification
- Override-proof activity recording
- Permanent access to latest manual revision
- Colour coded actions for ease of even's status interpretation
- One-click event creation
- Guidance through pre-defined forms and menus

Technical specifications

Operation system: Windows 10 & iOS

Browsers: Chrome & Firefox (for admin website)

Unity-based for 3D asset models

Requires internet connection

Required asset DMU (CAD files) for customization
